

# CMC-PMC-S01

## PAINT MIST COAGULANT

### Product Data Sheet

#### Description

 FLOTROL CMC-PMC-S01 is a Speciality Paint Mist Coagulant. made of modified bentonite and high-efficiency compound additives. It can rapidly remove viscosity of paint particles, gather scattered paint slag into dense floating clusters, achieve fast paint-water separation, keep circulating water clear, reduce COD and turbidity, save water cost and protect spraying equipment.

#### Application

This product is speciality use for Spray Booth

#### Benefits

Liquid form, easy to blend  
Special formula for Paint Kill  
Fast Flocculation  
Low Dosage  
Non-corrosive material  
Stable pH

#### Technical Parameters

Appearance	Clear Liquid
Main Ingredient	Modified Bentonite Composite
pH	5.0 – 8.0
Solubility	Fully soluble in water
Working Temperature	5 – 45 °C

#### Reccomended Dosage

Generally, the dosage range is 0.1 – 0.5 % of neat concentration vs Over Spray.  
(it may change under some conditions)

**Packaging** 25 kg/Pail; 40 Pails/Pallet

**Storage** Stored in a dry place below 35 °C

**Country of Origin** China
